Camp Sun 'N Fun

A Success Story About...Paul

The story of Paul best illustrates how the Camp Sun 'N Fun program achieves the goals and outcomes for our consumers and their families.

Paul is a middle aged man, from Gloucester County, with Down's syndrome. When Paul first attended camp he had aggressive tendencies. He would start to make friends but then get angry with them and need to find new friends. Paul was assigned to a small cabin to avoid conflict. The counselors have successfully used the programs at camp to help him with his social skills. This year we were able to move him into a large cabin. He has also succeeded in making lasting friends. Additionally, because Paul's mom knew how much he has progressed, and that Paul would be happy, safe, and well cared for at Camp Sun 'N Fun, she was finally able to have hip replacement surgery, go to rehab, and regain her health and strength without worry.
