

A Success Story About...Karline

“I have been here since November. When I came here I couldn’t speak anything in English. For me this program made me more confident and helped me believe in myself. My goal is to improve my English more and finish nursing school. Now I have my visa and I feel safe and I can work and pay for my

school. I work hard each day at my English. I am very excited to start classes! I want to say that this program is important for all foreigners. Starting a new life in a new country is very hard, and when you have the opportunity to take the classes for free it is very needed. This helped me in my English, I had a great time, and I met many great people. I will never forget it.”
