

REPAUNO PRESCHOOL DAY CARE CENTER

Infant and Preschool Child Care Program

A Success Story About...Kristine

Starting out as a young parent on our subsidized program, Kristine was able to obtain low-cost, dependable childcare and a stable home life for her child while she attended school to obtain a better job and more income to support her family. The child's father, Tom, saw how Kristine was bettering herself and how his child had excelled in Repauno's educational childcare program. He

decided that he, too, wanted to better himself and went into a training program to learn a trade so that he could help Kristine support their child.

After finishing their school and training, Kristine and Tom decided to get married and were able to get good jobs, sustaining themselves financially. The couple was able to apply for a mortgage and have another child, who graduated from our preschool program this past June, going into school and receiving Honor Roll his first year in the "big school". The family lives and works locally within the Gloucester County area.
