

# SENIOR CORPS COMMUNITY SERVICE PROGRAM

## Medicare Counselling

### A Success Story About..."Mr. A"

Mr. A came to the Medicare Counseling program as a new participant due to disability and being under the age of 65. Mr. A is suffering from fourth stage prostate cancer and is unable to work. He also was having no help with insurance through his wife. After an in-depth counselling session, it was learned that he was prescribed two cancer medications, Xandi 160 mg and Zytiga 1000 mg. Mr. A's anticipated cost for his two cancer medications, even with help from Medicare, is **\$19,589.00** per year. An evaluation of the best Medicare prescription plans presented to Mr. A. To help with the outrageous costs of those two medications, the program counselor researched and after several hours came up with pharmaceutical assistance that will pay in full for both cancer Medications for 1 year. Mr. A expressed his appreciation and told the counselor he would not have been able to pay for the medication and probably would have died if we did not find him help.
