Assess/Develop/Employ

A Success Story About...Jennifer

Upon graduation from our School to Career program, county resident Jennifer was unsure of her career path. She enrolled in our 25 day evaluation and 45 day employee development program, designed to identify goals and improve job-seeking skills. She continued her journey in Transitional Employment at Abilities.

Jennifer was always optimistic about working in the community. She set out to learn as many job skills as possible to help her prepare to one day work competitively. Shy by nature, she immersed herself in every activity offered, including Job Club and Situational Assessment.

Through active participation in these programs, Jennifer was able to gain valuable insight and training on what to expect when working in the community, and how to prepare for job fairs and interviews. She trained in Production, Janitorial and Food Services, but felt most comfortable and confident in Production.

After a successful interview at Amazon, Jennifer was offered employment. She is excited and proud to be a member of the Amazon team. Her duties include working in production, the stockroom, and the mail and sort center.

We are delighted for this new chapter in Jennifer's life and proud to have played a role in her success.
