

What impact has United Way funding had on The Arc Gloucester's Camp Sun 'N Fun?

The funding from United Way of Gloucester County significantly enhances Camp Sun 'N Fun's capacity to serve children and adults with intellectual and developmental disabilities and their caregivers by enabling higher staffing ratios, adaptive equipment, specialized programming, and tuition assistance, ensuring an inclusive, safe, and enriching camp experience for individuals of all support needs. This investment is critically important in New Jersey, where disability is a significant community issue. An estimated 11% of residents live with a disability, including cognitive or developmental challenges. United Way's support directly strengthens families, reduces caregiver stress, and expands access to essential respite and community-based supports, which cultivates healthier, more stable individuals, families, and communities throughout Gloucester County.
