

**Center for People  
in Transition Presents:**  
*A Success Story featuring...*  
**One of our clients**

Our client began working with our center in February 2024, and as a survivor of sexual abuse. This client continued to be harassed and abused by her siblings at home where she lived. At this time, she was also diagnosed with bipolar disorder and her family did not believe she was being abused due to her new diagnosis. We worked with her to gain her a safe living environment and gave her funding for our Patient Care Technology program. After completion of this program in August 2024, she was able to gain employment at one of the local hospitals. This job not only gave her a stable income to provide her with a safe and secure place to live, but also has started to help her go back to school to study for a nursing degree so she could help victims of sexual abuse. Due to the counseling that we assisted in gaining for her, she is flourishing and has also started to work on re-developing her relationship with her mother, and helping her mother understand her abuse.
