

**Together, we make
healthcare possible.**

United Way of Gloucester County funding is critical to ensuring continued access to essential reproductive health services for low-income, uninsured, and underinsured women served by Famcare. As the number of uninsured patients we serve continues to grow, this support allows us to provide vital services such as colposcopy, ThinPrep Pap tests, HPV testing, and preventive education for individuals who are ineligible for Medicaid. UWGC funding also covers the cost of medically necessary ultrasounds through our contracted provider, South Jersey Radiology, removing financial barriers to timely diagnosis. UWGC funding fills the gaps left by state funding, particularly for uninsured women, including younger patients presenting with breast concerns, ensuring they receive comprehensive and timely care regardless of ability to pay.

What impact has United Way funding had on Famcare?
