

What Impact Has United Way Funding Had on... FAMCARE?

United Way of Gloucester County funding is essential in ensuring access to vital healthcare services for low-income, uninsured, and underinsured women through Famcare. This support allows us to provide colposcopy services, ThinPrep Pap tests, and HPV testing, ensuring comprehensive reproductive healthcare and preventive education for those ineligible for Medicaid.

Through this funding, clients requiring ultrasounds can access services at South Jersey Radiology under Famcare's contract, with the costs covered by United Way funding. While NJCEED supports some patients and services, it does not address all needs. UWGC funding bridges the gap by covering essential services such as pelvic and breast ultrasounds, for uninsured, low-income women, including younger women with breast lumps who face financial barriers.

(comment provided by the organization on their Request for Funding Proposal to UWGC)
