

What impact has United Way funding had on Glassboro Child Development Centers?

Funding from United Way of Gloucester County provides essential tuition assistance that allows up to 30 low- to moderate-income ALICE (Asset Limited, Income Constrained, Employed) children to access safe, reliable school care they otherwise could not afford. This support ensures that working parents can maintain stable employment, prevents children from being unsupervised after school, and strengthens academic and social-emotional outcomes. UWGC's investment directly sustains the accessibility and stability of the program for families who need it most.
