#ADVENTUREON!

Our volunteer program serves 664 volunteers and 691 youth in Gloucester County. This program fills key training gaps by providing practical guidance that helps volunteers manage finances, address unit challenges, and create inclusive environments. The training aligns with council strategic goals, reflects volunteer feedback, and strengthens overall program quality.

United Way of Gloucester County funding makes this annual training program possible. It ensures training remains accessible, high-quality, and free to volunteers. Funding strengthens leadership skills, improves youth experience, increases retention, and supports inclusive and sustainable Scouting programs across Gloucester County.

What impact has United Way funding had on Scouting America, Garden State Council?
